Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Allowable Subject Matter

The indicated allowability of claims 18-20 is withdrawn in view of the newly discovered reference(s) to Coushaine. Rejections based on the newly cited reference(s) follow.

Claims 1-11 and 13-17 are allowed. Regarding claim 1, the prior art does not teach a method for aligning a light source to an integrating rod in a display system comprising, in combination with the additionally recited elements, fixing the lamp to the lamp interface after obtaining a desired lamp alignment; and coupling the aligned lamp assembly to the integrating rod.

Claims 19-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 2851

Claims 18 is rejected under 35 U.S.C. 102(b) as being anticipated by Coughaine (U.S. Pat. No. 5,855,430). Coughaine teaches providing a lamp 38 and a lamp interface 12 having an alignment aperture 20 disposed thereon. The lamp is aligned with respect to the lamp interface until a desired amount of light is focused on the alignment aperture (in this case the desired amount is no light on the aperture. Thus the lamp is inserted into the interface.) After the desired lamp alignment, the lamp is fixed to the alignment aperture by rotating the lamp thus forming an aligned lamp assembly. The applicant is directed to review figures 1-3 and 6.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
